Lessons Learned With the Hepatitis B Vaccination in Jails and Prisons

Jails and prisons can be settings where people at high risk for infectious diseases may access vaccination. In this webinar, Dr. Spaulding will discuss why offering hepatitis B vaccination in correctional facilities is a fitting public health intervention. When assessing appropriateness of giving a vaccine in a busy correctional health practice, considerations such as dosing schedule become important. Lessons learned from hepatitis B vaccination experiences may be applicable to administration of future vaccines, such as those for HIV and COVID-19.

Educational objectives:

- Describe the hepatitis B disease burden in adults, including those who reside in or are recently released from jails and prisons
- Estimate the risk for bloodborne disease, like hepatitis B, versus other routes of disease in U.S. correctional facilities

- Apply lessons learned from strategies for hepatitis vaccination in correctional settings to planning for future vaccines

This activity is supported by a sponsorship from Dynavax.

Continuing education credit (1.0 hours) available for:

Nurses: The National Commission on Correctional Health Care is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

NCCHC designates this educational activity for a maximum of 1.0 contact hours.

Physicians: The National Commission on Correctional Health Care is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. NCCHC designates this live activity for a maximum of 1.0 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Psychologists: The National Commission on Correctional Health Care is approved by the American Psychological Association to offer continuing education for psychologists. NCCHC maintains responsibility for this program and its content. This educational activity has been approved for up to 1.0 hours of credit.

CCHPs: Certified Correctional Health Professionals may earn up to 1.0 contact hours of Category I continuing education for recertification.

About the presenter

Dr. Anne Spaulding obtained her M.D. from the Medical College of Virginia and her M.P.H. through John Hopkins. She trained in internal medicine and infectious disease. For the past 22 years, she has focused on correctional health and has authored 100 publications. She served as medical director for the RI Department of Corrections, a combined jail/prison for 6 years. Since 2005 she has been on faculty at Emory's Rollins School of Public Health, where she is currently an Associate Professor of Epidemiology.
